

To allow the program to analyse your playlists, follow these steps.

**Step 1:** Launch the program. A webpage will open, click this button.

OAuth Token

OAuth Access Token

GET TOKEN

**Step 2:** Give permission to read your private playlists, request the token and follow the sign-in procedures.

×

Select scopes

Required scopes for this endpoint:

☒ playlist-read-private

You can optionally ask for any of these scopes:

☐ user-read-playback-position  
☐ user-read-email  
☐ user-library-modify  
☐ playlist-read-collaborative  
☐ playlist-modify-private  
☐ user-follow-modify  
☐ user-read-currently-playing  
☐ user-read-recently-played

☐ user-read-private  
☐ user-library-read  
☐ user-top-read  
☐ playlist-modify-public  
☐ user-follow-read  
☐ user-read-playback-state  
☐ user-modify-playback-state

If no scopes are requested, only public resources (e.g. public playlists) will be accessible. Read more about scopes at [Using Scopes](#).

REQUEST TOKEN

**Step 3:** Copy and paste this token into the program prompt.

OAuth Token
